

# AIMS INDIA

## Capability Statement

### Summary

Started in 2001 by a group of Indian nationals living in Washington DC, AIMS India provides financial support to NGOs in rural India who focus on improving the lives of the rural poor. AIMS India partners with organizations who work to strengthen and empower rural communities through improving access to quality education, health care, and infrastructure. Focusing its efforts in education, community development, women's empowerment, and disaster relief, AIMS has created many long lasting connections with NGOs in southern India who do tremendous work in their communities.

### Strengths

AIMS India address issues at their roots, none of the money donated to AIMS goes into operational costs, 100% of funds go straight to a partner NGO in India which uses only around 1% of funds for operational costs.

AIMS is a growing organization, we are a dynamic team, constantly looking for new members to join our cause.
